

POLY ASPARTIC

PRODUCT APPLICATION AND BENEFIT:

Composed of 45% solids designed to provide a high gloss with exceptional resistance to traffic and staining from automotive fluids.

Product has high UV resistance to reduce yellowing and peeling from the sun.

Applications would include garage floors, indoor flooring, outdoor flooring, outdoor countertops where a high gloss is desired.

Coverage:

One coat at 3mm will provide up to 700 sq. ft. on a one coat application.

Variance will be related to type of texture (roughness and absorption).

MIXING AND POT LIFE:

Product should be mixed on a 1:1 basis using by stirring by hand until well blended (approximately 1-2 minutes). Pot life at 75°F is 45 minutes.

CAUTION:

Product is flammable. Gas pilot light should be turned off prior to use. For indoor application or areas of lower ventilation, OSHA approved respirator is recommended as well as promoting ventilation with fans and opened windows and doors.

CURE TIME:

Tack free in one hour, foot traffic in 2 hours, move furnishings back on it in 24 hours and an automobile in 72 hours.
